Department of Mathematics and Statistics  
Memorial University of Newfoundland,  
Canada  
E-mail: [variayath@mun.ca](mailto:variayath@mun.ca)

# ASIAN JOURNAL OF STATISTICAL SCIENCES (AJSS)

## CALL FOR PAPER INSTRUCTIONS FOR AUTHORS

Call for Paper: Asian Journal of Statistical Sciences(AJSS) is double blind peer-reviewed international journal that publishes novel high-quality research articles and well-focused review articles in all areas of Statistical Sciences, including Data Science. AJSS welcomes quality original research papers and well-focused review articles in contemporary developments in Statistics from researchers and practitioners in the subject.

## AJSS INSTRUCTIONS FOR AUTHORS

The AJSS welcomes the submission of original research papers and well-focused review articles in Statistical sciences electronically as PDF directly to the Editor in Chief: [ajsseditorinchief@gmail.com](mailto:ajsseditorinchief@gmail.com) or [editorajss@yahoo.com](mailto:editorajss@yahoo.com) . Each submission should contain both blinded and unblinded versions of the manuscript.

The paper should be written clearly and concisely in English and have to include: Title, Name(s) and address(es) of author(s) in case of unblinded copy, Abstract, Keywords, Introduction, Methodology, Results and Discussion, Conclusion, Acknowledgement, References and Appendix, if any. Blind version of the manuscript should not contain authors' names anywhere in the manuscript. Pages should be numbered consecutively. "Abstract" should be a short summary of the paper with a maximum length of 250 words.

Authors wishing to include figures, tables, or text passages that have already been published elsewhere are required to obtain permission from the copyright owner(s) and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the authors.

While including tables, note that each table should start with a Table number and caption at the top. Tables should be sequentially numbered in Arabic numerals as Table 1, Table 2, etc. and the caption should follow the Table number, after a colon. Also, the Tables and captions should be centred.

All diagrams, figures and other illustrations should be named as figures, and numbered them consecutively in Arabic numerals (Figure 1, Figure 2, etc.) followed by a colon and a short caption at the bottom. All the Figures and captions should be centred.

Use Harvard system, and add DOI numbers for each reference, if it is available.

Examples of correct forms of references are given below:

Mathai, A.M. and Davis, T.A. (1974). Constructing the sunflower head, *Mathematical Biosciences*, **20**(1-2), 117-133.

DOI: 10.1016/0025-5564(74)90072-8

Mathai, A.M. and Pederzoli, G. (1977). Characterizations of the Normal Probability Law, John Wiley & Sons, New York.

It is the policy of the journal that no submission, or substantially overlapping submission, be published or be under review at another journal or conference at any time during the review process.

Submission of a manuscript implies that it has been approved by all authors as well as by the responsible authorities tacitly or explicitly at the institute where the work has been carried out.

The publisher and the editors will not be held legally responsible should there be any claims for compensation.

The peer-review process of the journal is a double blind process. While submitting the revised manuscript, the authors should clearly explain point-by-point as to how the reviewers' comments have been addressed. If the authors disagree with reviewers' comments, the reason(s) should be explained. Decision of the editorial board will be final. Those papers recommended by at least two reviewers will be accepted for publication.

We aim to complete the peer review process within 3 to 4 months, but it depends on the response of the peer reviewers.

Accepted papers will be published online in the web site of the journal. The journal does not charge a submission fee or publication fee. If the article is accepted for publication, it will be published without incurring any cost to the authors.

Once accepted, manuscripts should be submitted in LaTeX format of the journal. The submission should include the original source file and a PDF version of the compiled output.

## AIMS AND SCOPE

Asian Journal of Statistical Sciences(AJSS) aims to provide a platform for researchers in almost all areas of statistical sciences and related fields. The journal welcomes highly innovative research and review articles in all branches of statistical sciences, including data science. The main purpose of the journal is to provide a link between theoreticians and practitioners in Statistics and related areas through publishing quality research and review articles.

## ABOUT THE JOURNAL

Asian Journal of Statistical Sciences(AJSS) is double blind peer-reviewed international journal which publishes original research and review articles in all branches of Statistical sciences, including data science. It aims to facilitate a platform for researchers in almost all areas of Statistics and related fields so as to reduce the gap between theoreticians and practitioners. AJSS welcomes high-quality original research papers and well-focused review articles in contemporary developments in Statistics from researchers and practitioners in the subject.
